

Mini-Symposium on

“Programming Microbial Cell Factories by Synthetic Biology”

on Thu 21st Aug 2025

at Lecture Hall Natura XIV at the University of Turku

14:00 – 14:30 Eriko Takano, University of Manchester, UK, "Harnessing microbial synthetic biology/engineering biology for fine and speciality chemicals"

14:30 – 15:00 Eric Nybo, Ferris State University, USA, "Assembly Required: Engineering E. coli Polyketides with BioBricks"

15:00 – 15:30 Suvi Santala, Tampere University, "Refactoring catabolic pathways for efficient utilization of lignocellulosic biomass"

15:30 – 16:00 Pauli Kallio, University of Turku, "Optimizing engineered pathways in photoautotrophic cyanobacteria"

Welcome! No registration required
