

Become a Project Ace!

Do you want to enhance your project working skills, gain working life experience and possibly even some ECTS credits? Do you want the possibility to solve genuine business cases?

What is Project Aces?

Project Aces (or Projektissäät in Finnish) is a training course, and a possibility to gain skills for project work and the working life. The training consists of training days and a real-life development assignment from a local employer. The development assignments are tackled by multidisciplinary groups of 3-5 university students. The development assignments require the students to show initiative, and take an active role in team work. The training is open to ca. 70 students.

To whom?

The training is aimed at undergraduate and master level students of the higher education institutions of Turku, and for graduates of 2012 or later. For undergraduates, two years of successful studies is recommended. Also foreign degree students and exchange students are welcome, if they are in Turku from October to April (vacations excluded).

When?

The training is organised from 23 October 2013 to 31 April 2014.
